ABSTRACT

- Furniture items, Shirts, Home appliances, etc.. ordering is a form of electronic commerce which allows customers to directly buy goods from a seller over the internet using a web browser. Customer can find a product based on type of categories and also by visiting the website and searching among alternative products using a shopping search functionalities, which displays the same products availability and pricing at different e-retailers. When an online store is set up to enable businesses to buy from another businesses, the process is called business- to-business (B2B) online shopping. Typical online store enables the customer to browse the firms range of products and services.

INTRODUCTION

- This project Shop For Home has been developed in Angular, Java Spring Boot and MySql.
- The Shop For Home project is an application which is based on managing the furniture items and sell the furniture items online.
- The main purpose for developing this project in Angular and Java Spring Boot is to manage all the details about furniture item, furniture item category, company, order, sales etc.

INTRODUCTION

- There are two categories of user available in this project. First one is admin and second one is user. Admin can add furniture item category and can also manage the sales details.
- This Angular project very helpful for maintaining the sales activity in furniture item. In this
- Project customer can see the details of furniture item category etc.
- Only Admin can edit or delete the details of furniture item.

USER FUNCTIONALITIES:

- As a user I should be able to login, Logout and Register into the application.
- As a user I should be able to see the products in different categories.
- As a user I should be able to sort the products.
- As a user I should be able to add the products into the shopping cart.
- As a user I should be able to increase or decrease the quantity added in the cart.
- As a user I should be able to add “n” number of products in the cart.
- As a user I should be able to get the Wishlist option where I can add those products which I want but don't want to order now
- As a user I should get different discount coupon

ADMIN FUNCTIONALITIES:

- As an Admin I should be able to login, Logout and Register into the application.
- As an Admin I should be able to perform CRUD on Users.
- As an Admin I should be able to Perform CRUD on the products.
- As an Admin I should be able to get bulk upload option to upload a csv for products details
- As an Admin I should be able to get the stocks.
- As an Admin I should be able to mail if any stock is less than 10.
- As an Admin I should be able to get the sales report of a specific duration.
- As an Admin I should be able to set of users

TECHNOLOGIES USED

- **HTML**
- **CSS**
- **JAVASCRIPT**
- **TypeScript**
- **JAVA SPRING BOOT**
- **MYSQL**
- **ANGULAR**
- **VISUAL STUDIO CODE**
- **TOMCAT**
